

ISOTOPES FOR BETTER LIFE

Located in Moscow, JSC Isotope is a subsidiary of Rosatom State Atomic Energy Corporation, responsible for distribution and marketing of isotope products, produced by Rosatom manufacturers.

For more than 60 years JSC Isotope has been delivering radioactive and stable isotopes for all major applications. Rosatom enterprises are equipped with fission, cyclotron, electromagnetic and gas centrifuge technologies that allow to produce a broad product range.

We offer our customers isotope-based products, including radiopharmaceuticals, medical generators, industrial sealed radioactive sources as well as raw material. We supply isotope products all over the world by air, sea and land.

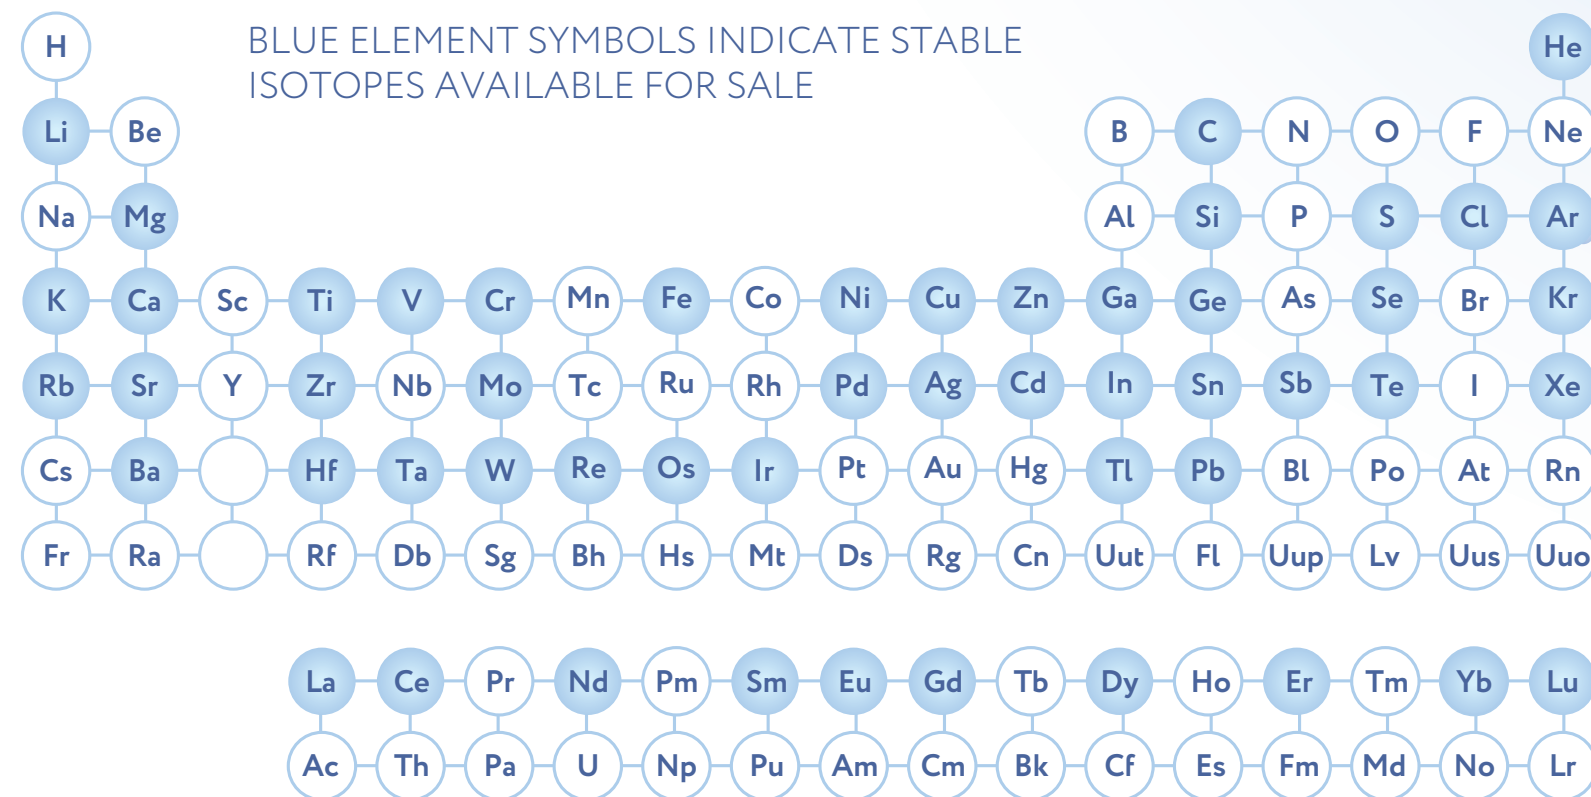

OUR TOP PRIORITY IS TO DRIVE THE DEVELOPMENT OF THE MARKET AND TO ENSURE SUPPLY CHAIN SECURITY.

STABLE ISOTOPES

STABLE ISOTOPES

Rosatom is the largest producer of stable isotopes in the world. JSC Isotope supplies a wide range of stable isotopes produced by both electromagnetic and gas centrifuge technologies.

We offer key stable isotopes with high level of enrichment and purity for different fields of applications, including medicine, industry and science.

KEY ISOTOPES FOR MEDICINE, INDUSTRY AND SCIENCE

OUR PRODUCTS

WE OFFER Internal backup reactors and radiochemistry

FOR MEDICINE

JSC Isotope has an extensive expertise in organizing secure supplies of products and solutions for nuclear medicine.

Our product portfolio includes medical isotopes used in therapy and diagnostics.

FOR INDUSTRY

JSC Isotope is a major supplier of industrial radioisotopes used in sterilization, non-destructive testing, material analysis, technical control, oil well logging, agriculture etc.
